

具尊嚴及人性化的設計 雙冷凍系統高效率運轉

*Efficient Dual Refrigerating System
with Dignity and Humanized Design*

設備特點：

- 冷凍庫體採組合式結構設計，庫板為高密度硬質 PU 一體灌注發泡成型，庫板間以子母式旋轉扣鉤作緊密結合，確保冷凍庫優越的氣密與隔熱性能。
- 採用雙冷凍系統獨立運轉，冷卻效率比傳統方式高達 70%，且可避免機組萬一故障時，造成冷庫失溫的風險與困擾。
- 功能完善的液晶顯示及溫控系統，操作管理簡易。可依客戶需求與電腦管理系統連結，做警示保護或遠端監控裝置。
- 冷庫內每一床架可承載 150Kg，堅固耐用。依人體工學設計，配合特殊滑軌裝置及升降系統，輕巧地進行搬運作業。

FEATURES:

- Assembly construction Refrigerating cabinet with rigid foam-in-place PU panels and joint hooks for superior sealed effect & insulation performance.
- Dual independent refrigeration system, with 70% higher cooling efficiency than tradition and prevent from totally failure when single unit breaks down.
- LCD display and temperature control system for easy use, able to connect with computer system for warning, protection and remote monitoring as per requirement.
- Each bed can hold 150 Kg, with special roller tracks design and elevator system for easy moving operation.

完工實績： 可依客戶需求，提供完整的規劃設計、設備供應和售後服務。

Complete design and equipment supply can be provided upon request with after services.
