

## Steam & Hot Water Dispenser

### Innovative Steam Dispenser for speed heating of tea & beverage

The Steam Dispenser provides high temp steam to heat up tea or beverage, making optimal hot drink in a few seconds. Easy operation, save time/labor with big capacity can meet peak hour demand for variable and volume drinks. It is a profitable equipment from its cost, efficiency and quality.

#### Features and Advantage:

- **Enhance hot drink quality**  
Steam fast heats up drink without compromising flavor.
- **Speedy heating the drink**  
Faster and easier operation than gas/microwave oven.
- **4 Temperatures programming**  
Optimal temperature setting for different tea/beverage.
- **Durable stainless steel boiler**  
Sanitary, safe and efficient for steam/ hot water supply.

#### Safety Protection Design:

- **Boiler water level probe**  
Auto shut down when high/ low water level is detected.
- **Boiler pressure auto relieve**  
Balanced pressure to avoid boiler explosion & damage.
- **Pump motor thermally protected**  
Auto shut down as no water supply and pump overheat.
