

# Commercial Induction cooker D350HP

## Product features

1. Startup Screen Display: 3500W; each level decrease shows 500W, and each level increase shows 100W. Levels above 800W allow continuous heating, while levels below 800W use intermittent heating.
2. Temperature: 60-240°C, adjustable in 20°C increments. The default startup temperature is 100°C.
3. Time: 0-180 minutes; each increase adds 5 minutes, and each decrease subtracts 1 minute.
4. Error Codes Display: E0, E1, E2, E3 – providing real-time machine status updates.
5. Equipped with 4 cooling fans.
6. Certifications: CE/EMC/ROHS/REACH and China CCC certified.

## Specification

Product Type	D350HP
Electrical	220V ~ 240V / 50Hz/60Hz
Rated power	3500W
Dimensions	W327 D 420 H98 (mm)
Net Weight	5.4 kg
